

INDEX.

	Page.		Page.
Abbe, Prof. Cleveland. (Notes by the Editor.)		Observation of halos	305
Early history of the thermometer and barometer	16	Thermometer exposure	306
Reprint of early meteorological charts	16	Fake storms	307
Meteorology in the public schools	17	Practical utilization of lightning	307
Liquid air (Linde's apparatus)	18	Mountain storms, by A. D. Elmer	307
Value of meter and yard	19	Landslide in Vermont	307
International cloud observations at Toronto	19	Origin of the St. Louis tornado, by M. C. Walsh	308
Suggestions to observers	55, 99	Frost formations	308
Fall of an aerolite in Arizona	56	Earthquake-proof buildings	309
Cycles in meteorology	57	Thunderstorms in Franklinville, N. Y. (J. W. Kales)	309
Development of the kite by European scientists	58	Kites at the Chicago conference, August, 1893	310
Musschenbroek's theory of the kite	59	Origin of descending gusts of wind. (C. A. Love)	351, 447
Dr. Thomas Young on the kite	59	Postal telegraph clock and weather bulletin	351
Brandes on the kite	59	Electric waves in the atmosphere	352
Cavallo's experiments with kites	60	Electrical districts	352
Chemical composition of the upper air	61	Lightning and magnetic rocks. (Abstract from F. Pockels.)	352
Opening of navigation in Canada	63	Structure of hailstones. (Description by F. Rinne.)	352
Ice in Kennebec River	98	Ancient climate of Arizona	353
Fire at Huron, S. Dak.	98	Vitality of seeds	353
Stereoscopic study of clouds	98	Mauritius—meteorology and crops	354
Long-continued meteorological records	98	Practical science in Germany. (F. H. Mason)	354
Monument to Buys-Ballot	99	Climatological data for Jamaica, W. I.	259, 356
Seasonal forecasts for Oregon, by B. S. Pague	161	Cyclone in Nicaragua	356
Cloud heights—a problem for students	161	Seismic noises	393
Franklin Kite Club	162	Old weather records	398
The kite as used by Espy	163	Depth of hail fall	399
Kite used in 1822 by Fisher	163	High level stations in Jamaica	399
Archibald on kites	164	Forms of lightning	400
Efficiency of windmills (extract from Douglas Archibald)	164	Resultant and prevailing winds	400
Franklin Kite Club and James Swaim	165	Frost formation in St. Paul. (Report by H. Volker)	401
Kites in America and Europe	165	Handbooks of the Deutsche Seewarte	401
Weather telegraphy in England and America	205	On verifying the Laplacian barometric formula	443
Captain Dansey's kite for stranded vessels	206	Circular by the Chief of the Weather Bureau	445
Kerkam's kite with rocket signals	206	Mountain stations in North Carolina	445
Use of the search light in meteorology	206	Hydrodynamic equations for the atmosphere. (C. Chree.)	445
Waterspouts off Long Island	207	Rain drops: their size and rate of fall	445
Waterspout, cloudburst, or tornado	207	Atmospheric electricity—Brillouin's theory	446
Character of the skylight	207	Hurricanes in the West Indies, by J. Ridgway, Jr.	447
Atmospheric vapor	208	Altitudes of clouds (with letter from B. C. Hawkins)	447
Meteorological use of the term "Local"	208	Distant cloud banks	448, 543
Water measurements for irrigation	208, 545	The kite in France. (Abstract from Teisserenc de Bort)	490
Melting snow and river floods	209	Local climatic changes	491
Snowfall in Colorado	210	Celebration of the semicentennial of the Royal Prussian Meteorological Institute	491
Evaporation at Fort Collins, Colo.	210	Meteorological station in Terra del Fuego. (M. Y. Ransom)	493
Hail and a rain gauge for its measurement	210	Weather Bureau station on Mount Tamalpais	493
Ignis fatuus or Jack-o'-Lantern	211	Mechanical determination of resultant wind. (Besson's apparatus)	540
Current weather and future crops	211	Meteorological stations of Harvard University	540
Secular changes in climates and crops	211	Meteorology in the United States Geological Survey	541
Peculiar mountain storms (note by J. H. Struble)	212	Electric storms at Sacramento	542
Cirrus clouds on the northwest side of a storm	212	Distant cloud banks	543
Anchor ice	212	The tension of aqueous vapor	543
Chinook and the signs of its approach, by A. B. Coe	213	Cloudy condensation	543
Frost formations	213	Cycles in meteorology	544
Records of foggy and cloudy days	249	Chinooks in Iowa	545
Homogeneity and uniformity	249	General climatic conditions for 1897	569
Electrical districts	249	Aitken, John, views on condensation of vapor	543
Tornado frequency per unit area	250	Tension of aqueous vapor	544
Thunderstorms at Eustis, Lake Co., Fla.	251	Anderson, Dr. W. W., earthquake at Statesburg, S. C.	258
Mechanism of thunderstorms	251	Arago, Dominique François Jean, classification of lightning	400
Frequency of thunderstorms	251	Archibald, Douglas, on kites	164
Audibility of thunder	252	Efficiency of windmills	164
Movements of winds and clouds in Minnesota	252	Assmann, Dr. Richard, celebration of the semicentennial of the Royal Prussian Meteorological Institute	492
Hourly results from self-registers at W. B. Stations	252		
Recent earthquakes	257, 310, 399, 448, 493, 542	Banks, Dr. Albert A., lightning strokes	352
Seismographs at meteorological stations	259	Bárcena, Dr. Mariano, contributes Mexican data	1, 17, 43, 61, 85, 98, 123, 189, 212, 235, 259, 285, 308, 339, 303, 356, 381, 403, 425, 471, 483, 519, 538
Climate and crime	259	Bates, W. S., kite used by Sir George Nares (abstract)	312
Hot winds in Missouri	260	Barwick, James A., electric storms of California	539
Hot winds in Kansas	260	Behrman, Captain, log kept by	485
Bright meteor	261	Berry, James, climate and crop service. (See Table of Contents.)	
Death of Mr. Joseph Cottier	303	Besançon, balloon ascension by	443
Deaths of Weather Bureau observers	303		
Retirement of Professor Hann	303		
Cloud heights at Toronto	303		
Rain gushes in thunderstorms	303		
Importance of sound theories	304		

	Page.		Page.
Besson, L., instrument for determining mean wind direction.	540	Hall, Maxwell, contributes data for Jamaica, W. I.	235, 259, 285, 308, 339, 356, 381, 425, 471, 483, 519
Bigelow, Prof. Frank H., observations to determine the state of the sky along the path of the solar eclipse, May 28, 1900	394	Hammon, Wm. H., operation of the Mount Tamalpais station for September, 1897.	397
Standard system of coordinate axes for magnetic and meteorological observations and computations.	201	Report on location and elevation of instruments at Mount Tamalpais, Cal.	494
Blake, F. L., cloud observations at Toronto.	19	Weather in the citrus regions of California.	519
Blythe, W. T., specimens received from.	353	Hand, Prof. E. E., frost formations.	307
Bort, Teisserenc de, on dynamic meteorology.	491	Hann, Prof. Julius, retirement of.	303
Brandenburg, Frederick H., report on snowfall in Colorado.	210	Hargrave, Lawrence, the cellular kite.	312
Brandes, Heinrich Wilhelm, theory of the kite.	59	Harrington, Prof. Mark Walrod, exploration of the upper air.	313
Bravais, Auguste, relative frequency of halo phenomena.	306	Hatch, E. J., maps showing landslide.	307
Brennan, J. F., contributes data.	259, 308, 356	Hazen, Prof. Henry Allen, areas of high and low pressure.	1, 43, 85, 123, 189, 236, 286, 339, 382, 427, 473, 522
Bretonniere, J., wind eddies at Constantine, Algeria.	311	Forests and rainfall.	395
Brillouin, Prof. Marcel, winds and clouds.	437	Bright meteor.	484
Atmospheric electricity.	440, 446	Hawkins, Barry C., seismic noises in North Carolina and Georgia.	393
Broadfield, J. M., weather and crops in Georgia.	211	Area of heavy rainfall in the southern Appalachians.	442
Buisson, electrical experiments by.	441	Proposed station on Satulah Mountain, N. C.	445
Butler, Thomas H., early use of wire in kite flying.	135	Measurement of cloud altitudes in mountainous regions.	447
Buys-Ballot, monument to.	99	Hellmann, Gustav, history of the thermometer and barometer	16
		Reprint of early charts by.	16
		Rain observations by.	249
Cailletet, Prof. L., analysis of air.	62	Henry, Alfred J., contributes the meteorological tables and climatology of the month. (See Table of Contents.)	
Photographic apparatus for measuring the altitude attained by balloons.	443	Explanation of meteorological tables.	20, 166, 314, 357, 448, 546
Campbell-Hepworth. (See Hepworth.)		Notes explanatory of the charts.	21, 166, 315, 357, 449, 547
Carpenter, Prof. L. S., Poudre River studies.	209	Local storms.	86, 190, 236, 286, 383
Evaporation, formula for.	210	Excessive precipitation in the United States.	13
Cavallo, Tiberius, electrical experiments with kites.	60	Climate of Alaska.	248
Chanute, Octave, prize for monograph on kites.	136	Tables prepared by.	252
Chree, Dr. Charles, hydrodynamic equations for the atmosphere.	445	Henry, Joseph, humidity of the atmosphere during rain.	544
Clancy, N. J., cyclone in Nicaragua.	356	Hepworth, Lt. M. W. Campbell, aurora australis of April.	204
Clayton, Henry Helm, cloud measurements at Blue Hill.	135	Hermite and Besançon, balloon ascension by.	443
Claxton, F. F., appointed director Royal Alfred Observatory, Mauritius.	354	Herring, A. M., dynamic flight (abstract).	248
Cline, Dr. Isaac M., freezing weather in the Texas sugar and vegetable regions.	521	Holt, William I., ice and snow on Kennebec River.	98
Coe, A. B., chinook, and the signs of its approach.	213		
Comly, George, hot wave at Willow Springs, Mo.	260	Jennings, Thorp B., hailstorm at Topeka, Kans.	237
Cottier, Joseph, equations of hydrodynamics adapted to problems connected with the movements of the earths atmosphere.	290	Johnstone, Robert, contributes data.	444, 483
Death of.	303	Jordan, Thomas B., sunshine recorder heliograph.	485, 486
Craig, Commander J. E., contributes data.	189, 235, 285, 339, 381, 425, 471, 519		
Cunningham & Co., value of Weather Bureau warnings.	522	Kales, John W., thunderstorms in Franklinville, N. Y.	309
Curtis, R. H., comparison of Campbell-Stokes and Jordan sunshine recorders.	489	Explosive noises at Franklinville, N. Y.	393
Cuthbertson, John, kites used by.	60	Kerkam, Robert E., kites with rocket signals.	206
		Kimball, Capt. S. I., communicates data.	425, 471, 519
		Koettgen, Else, optical measurements by.	207
Dabney, Jr., Dr. Charles W., appointed special agent.	63		
Dallas, W. L., preliminary discussion of certain cyclical changes in India.	532	Lamprecht, Guido, abstract from, on periodicities.	57
Dansey, Captain, kite for stranded vessels.	206	Linde, Dr. Karl, experiments on condensation of gases.	18
Dart, Jacob E., report of earthquake in Guadeloupe by.	257	Ling, Charles W., greatest daily range of temperature at Havre, Mont.	523
Davidson, Prof. George, advantages of station on Mount Tamalpais.	493	Love, Charles A., formation of hail.	351, 447
Davis, J. Woodbridge, experiments with kites.	313	Lovell, Surgeon General Joseph, ordered surgeons at military posts to keep records of the weather.	491
Davis, Wm. Morris, and others, prizes for school work on weather and climate.	18	Lyons, Curtis J., contributes data.	1, 43, 85, 112, 123, 180, 189, 226, 235, 285, 339, 370, 381, 416, 425, 462, 471, 519
de Kay, Charles, experiments with electric waves.	352	McAdie, Alexander G., whirling alto-stratus.	245
Decker, Horace M., mechanics of the kite.	349	Problem of the kite.	246
Dunovant, William, value of Weather Bureau warnings.	522	Climate as a controlling factor in long distance transmission of electrical energy.	439
Dunwoody, Col. H. H. C., storm warnings and weather forecasts. (See Table of Contents.)		McClure, Prof. S. E., death of.	303
		Mallet, earthquake studies by.	309
Eddy, Wm. A., experiments with kites.	310, 312	Manissadjian, J. J., observations at Merzivan, Turkey.	245
Elmer, A. D., mountain storms.	307	Margary, H. W. O., record of thunderstorms at Eustis, Fla.	251
Engelenburg, E., theory of thunderstorms.	251	Maring, Delos T., improved sunshine recorder.	485
Espy, Prof. James P., kite experiments.	163	Marvin, Prof. Charles Frederick, mechanics and equilibrium of kites.	136
Faye, H., theory of cyclones.	305	Table for conversion of indicated wind velocities into true velocities.	256
Fergusson, S. P., early use of wire in kite flying.	135	Mascart, names of halo phenomena.	305
Highest kite ascension at Blue Hill.	392	Mason, Frank H., Physical-Technical Institute at Charlottenburg, Berlin.	354
Fisher, George, temperature determinations by means of kites	163, 164	Masterman, Stillman, rain gushes in thunderstorms.	304
		Maynard, account of hailstorm in New York, N. Y.	399
Gee, Henry M., meteor near Tombstone, Ariz.	56	Meigs, Joseph, requested monthly meteorological records from registers of the land office.	491
Glaisher, James, weather map and observations in 1850.	206	Mercer, C. F., value of Weather Bureau warnings.	522
Garriott, Prof. Edward B., wind-barometer table.	204	Mills, J. N., experiments on congelation of orange juice.	521
Geddes, George, temperature at Fairmount, N. Y.	398	Moore, C. R., changes in climate at Birdsnest, Va.	212
Gibbs, G. J., earthquake at Cockburn Town, Grand Turk, W. I.	542	Moore, H. H., record of thunderstorms by.	252
Glenn, Samuel W., memorable snow storms in South Dakota.	15	Moore, Prof. Willis L., circular in commendation of Weather Bureau officials in the yellow fever district.	445
Goudy, W. H., death of.	303	Station on Mount Tamalpais.	494
Gowey, H. D., inquiry in regard to meteorological cycles.	57		
Gun, James, distant cloud banks.	543		

	Page.		Page.
Morley, Prof. Edward Williams, report of earthquake at Cleveland, Ohio	258	Simonton, Dr. A. C., importance of reporting fog.....	249
Seismograph at Adelbert College.....	448	Temperature of the air: at what point its determination is most important.....	306
Morrill, Park, river and flood service. (<i>See</i> Table of Contents.)		Smith, Herman W., recent publications.....	134, 199, 245, 294, 348, 393, 444, 483
Reduction of the temperatures and pressures for 1897.....	572	Smith, Jr., John F., corrects newspaper reports.....	307
Morton, Hon. J. Sterling, establishment of stations.....	494	Smith, W. M., note on lightning by	250
Müntz, A., collection of specimens of air.....	62	Springer, Ralph, meteorological records by.....	99
